

Additional Laboratory Services

In addition to our standard wine and juice panels, myEnologist offers several additional tests for our clients' convenience. These tests are not included in the subscription pricing; the price for each test is listed below. Please note that these tests require different sample volumes than our standard panels and we need one sample per test requested. Please write on the sample label which test you are requesting.

Turbidity (NTU) - \$15/sample (50 mL sample required)

Brettanomyces Testing - \$50/sample (50 mL sample required)

Free SO₂ on Juice Samples - \$15/sample (50 mL sample required)

Stability Testing: (Please fill out the Stability Test Request Form)

All stability tests with the exception of Bentonite Trials can take up to 2 days. Bentonite Fining Trials take 3 days and if submitted after noon on Thursday will be held until Monday to start.

- Heat Stability Test - \$20/sample
(250 mL sample required)
- Bentonite Fining Trials - \$70/sample
(750 mL sample required)
- Davis Conductivity Test - \$30/sample
(375 mL sample required)
- DIT – Degree of Tartrate Instability - \$50/sample
(375 mL sample required)
- ISTC50 – \$50/sample
(375 mL sample required)

Samples received on Friday may be held to run on Monday.
Free SO₂ Juice samples will be run on the day they are received.
